```java
import java.util.Scanner;
public class NouaD {
public static void main(String[]args) {
Scanner key = new Scanner(System.in);
int a = key.nextInt();
int b = key.nextInt();
double c = Math.sqrt(Math.pow(a, 2) + Math.pow(b, 2));
System.out.println("ipotenuza triunghiului: " + c);
}
}
```
